Engineering Technical Support/Problem Solving

Mr. Delli Paoli is available to help your employees in any way his technical and management expertise can be of assistance to your business.

Mr. Delli Paoli is an effective problem solver. He prides himself in the ability to make order out of chaos.

Alex is also a trained second responder. Second responders get involved after a tragedy or disaster to evaluate the situation and get operations back in order. First responders (fire, police, etc.) secure a site from immediate physical hazards. Second responders plan and execute to bring all physical aspects back to normal conditions. They also deal with business issues such as IT and product availability.

Alex's technical experiences include:

3/1980 - 9/1984: Staff Engineer, corporate facilities design engineering group. Responsible for design engineering and project management for piping, plumbing, heating, ventilation, air conditioning and utilities as required by client divisions in the corporation. Experience encompassed mechanical design for 100% ethylene oxide sterilizer facilities, research laboratories, biological and radiological hazard production facilities, laboratories, fermentation and extraction facilities, and infant nutritionals production facilities.

9/1976 - 2/1980: Project Engineer, Heating, Ventilation and Air Conditioning; Extensive design and start-up experience with clean room facilities for large and small volume parenteral production.

7/1974 - 8/1976: Heating, Ventilation, Air Conditioning design engineer for a large consulting firm. Responsible for all aspects of design, load calculation, equipment sizing and specification. Projects ranged from high-rise commercial office buildings to automated warehouses.
