Interim Engineering Management

Mr. Delli Paoli is available to help you manage your team, or supplement your staff.

Mr. Delli Paoli's experience includes more than 25 years in engineering management. This experience makes him very confident managing capital expenditure planners, project managers, facility planners, Process and Controls Engineers, commissioning/qualification/validation professionals, energy management and the support staff required to implement all the above. His experience includes:

8/2007 - 2/2011: Director, Engineering Services; Managed functions of Project Management, Facility Planning and Capital Planning.

8/2001 - 7/2007: Manager, Engineering Services; Manage functions of Project Management, Qualification Engineering and Engineering Assurance.

1/1998 - 7/2001: Manager, Engineering Services: Manage functions of Capital Planning, Process and Controls Engineering, Engineering Assurance and Manufacturing SPC.

5/1991-12/1997: Manager, Process and Controls Engineering: Worked with research and development organizations to assure proper scale-up potential of new products. Position had three major thrusts: operations support, project management, and strategic planning and implementation of new technologies.

8/1988 - 4/1991: Corporate Energy Manager: Overseer of all corporate energy use.

10/1984 - 8/1988: Section Manager, Mechanical Design: Technical consulting function for biohazard research and production facilities for biosafety levels BL-1 through BL-3 and OSHA related exhaust and containment systems to meet current industry standards.
